

Post: Climate Change Adaptation Policy Fellow (fixed term, part-time)
Department: Cryptogamic Plants and Fungi
Division: Science

Job Description

Key Responsibilities

- Delivery of project work commissioned by ClimateXChange

Specific Responsibilities

Key Adaptation Policy Mapping

- Summarise how adaptation is incorporated throughout a policy area, what is working/what isn't and provide recommendations to improve policy outcomes.

Good Practice Case Study at Local Level

- Provide illustrative case-studies for inclusion in policy documents or other means of communication to inform local authorities and others involved in implementing adaptation in Scotland. Produce small number (< 3) case-studies covering a variety of adaptation issues/options. Type and number of case studies to be decided following engagement with stakeholders, but could include:
 1. Mainstreaming adaptation at the local level
 2. Good practice
 3. International case study to illustrate action that has not yet been done in Scotland
