

A statistical test of the Coppins & Coppins (2002) ecological continuity indicator set, taken from Ellis, C.J. (2015) Ancient woodland indicators signal the climate change risk for dispersal-limited species. *Ecological Indicators*, 53: 106-114

Table 1. Statistically significant indicator species based on analysis by Whittet & Ellis (2013) or in this study using Indicator Species Analysis.
